

TRANE HOME COMFORT SYSTEMS PRODUCT GUIDE

Introduction

Whether you're looking to upgrade your heating system, add air conditioning, improve indoor air quality, or find a better solution for a specific room in your home,

Trane offers a complete line of HVAC products designed to keep you comfortable in every season. This guide introduces you to the most popular and effective Trane solutions available through Noonan Energy - your trusted local Trane dealer serving Massachusetts homeowners.

Air Conditioning Systems

[Learn More](#)

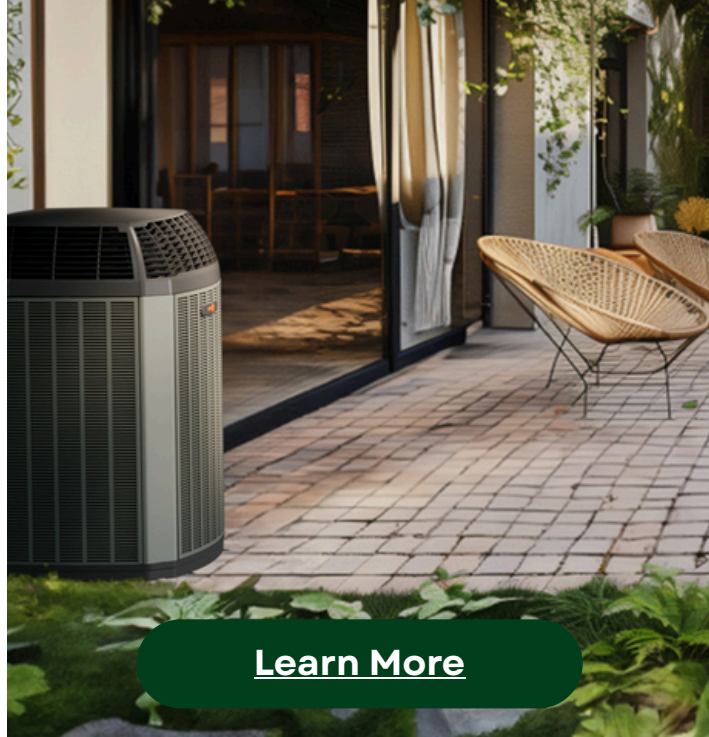

Trane central air conditioning systems are built to deliver reliable, energy-efficient cooling throughout the hottest months of the year. With models featuring SEER2 ratings up to 21.5 and advanced TruComfort variable-speed technology, Trane AC systems operate quietly while providing precise temperature control and consistent airflow. These high-efficiency units not only keep your home cool and comfortable, but they can also lead to significant long-term savings on your energy bills.

Furnaces

When it comes to winter warmth, Trane furnaces are known for their performance, durability, and efficiency. With options that include modulating, two-stage, and single-stage heating, Trane furnaces are engineered to deliver the right level of comfort while using less energy. Models with variable-speed blower motors and smart humidity control help maintain a consistent temperature throughout your home, even on the coldest New England nights.

Heat Pumps

[Learn More](#)

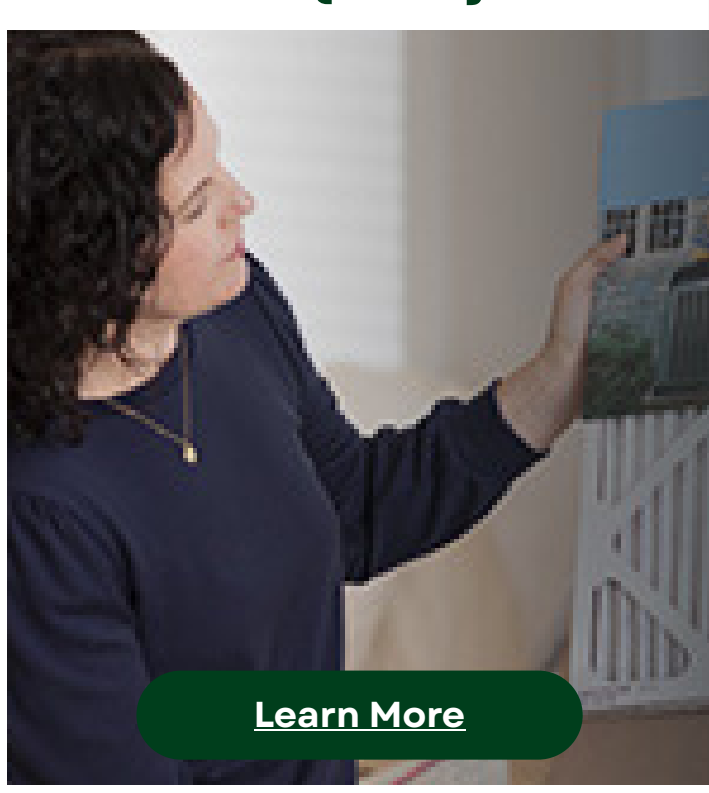

For homeowners seeking a year-round solution in one system, Trane heat pumps offer efficient heating and cooling in a single unit. These systems are ideal for Massachusetts homes, working efficiently in both winter and summer to provide comfort and energy savings. Trane's lineup includes single-stage, two-stage, and variable-speed models, all designed to run quietly and integrate seamlessly with your existing ductwork.

Ductless Mini-Split Systems

If you need heating and cooling in a specific area of your home - like a sunroom, garage, or addition - Trane ductless mini-split systems are a perfect fit. These systems don't require ductwork and are available in both single- and multi-zone configurations, allowing for independent temperature control in each room. With a sleek design, whisper-quiet operation, and high SEER2 ratings, Trane ductless systems provide maximum comfort with minimal disruption to your home's layout.

Indoor Air Quality

[Learn More](#)

Indoor air quality is more important than ever, and Trane has a full suite of products to help you breathe easier at home. From high-performance air filters and whole-home air purifiers to humidity control systems, Trane solutions are designed to reduce allergens, pollutants, and odors, all while maintaining optimal moisture levels. Systems like the Trane CleanEffects air cleaner can remove up to 99.98% of airborne particles, making your home's air cleaner and healthier for the entire family.

Why Trane + Noonan Energy

With over a century of innovation and a commitment to quality, Trane has earned its reputation as one of the most trusted names in home comfort. Noonan Energy proudly installs Trane equipment because it's built to perform and designed to last. Our team will help you choose the right system for your home, provide expert installation, and support you with ongoing service and maintenance.
